

CLINTON AVE.

**NPC 4 PROJECT**

The project will upgrade the bracing and anchoring of all electrical, mechanical, and architectural systems, components, and equipment ensuring critical patient care equipment and systems can function after a strong earthquake

**NPC 5 PROJECT**

NPC 5 requires hospitals to have on-site supplies of water, holding tanks for sewage and liquid waste, and an emergency electrical system (including fuel) sufficient to support 96 hours of critical care operations after a strong earthquake. This project will install new tanks on the property to support the hospital.

**SPC 4D PROJECT**

Retrofitting the buildings to meet 2030 Seismic Safety Standards.

**NEW 18 BED SNF UNIT PROJECT**

Renovation an existing hospital floor for a new 18 bed Short Term Skilled Nursing Facility.
